Accelerating Aon United Program to Drive ~\$350m Expected Annual Savings

We built Aon United in response to ongoing, increasing risk and demand from our clients and are now investing in:

- Aon Business Services: investing in platform simplification and migration to scalable, agile cloud platforms, application rationalization, streamlined and flattened organization, and standardized tools and reduction of real estate footprint to its new way of hybrid working
- Organizational model changes to simplify our structure, increase accountability, align skills and capabilities required to deliver on the opportunity embedded in Aon Business Services as well as workforce changes to strengthen our client serving capability

Accelerating Aon United Program is expected to deliver:

- Total annual, estimated run-rate savings of ~\$350 million, to be achieved by the end of 2026, which will contribute to ongoing, sustainable long-term margin expansion
- Cash charges of ~\$900 million, for a savings ratio of 2.6x, largely for technology costs and workforce rationalization
- Additional ~\$100 million non-cash charges, largely related to asset and lease impairments
- No significant incremental capex, noting we expect capex will grow with the business in the future, from ~\$220-\$250 million capex in 2023, as previously communicated
- We plan to provide quarterly updates on savings realized and charges incurred

Program designed to contribute to overall strategic and financial goals of sustainable, long-term value for clients, colleagues, and shareholders

Expected Restructuring Program

Total Savings of ~\$350m

~\$900m cash restructuring charges

Savings ratio of 2.6x

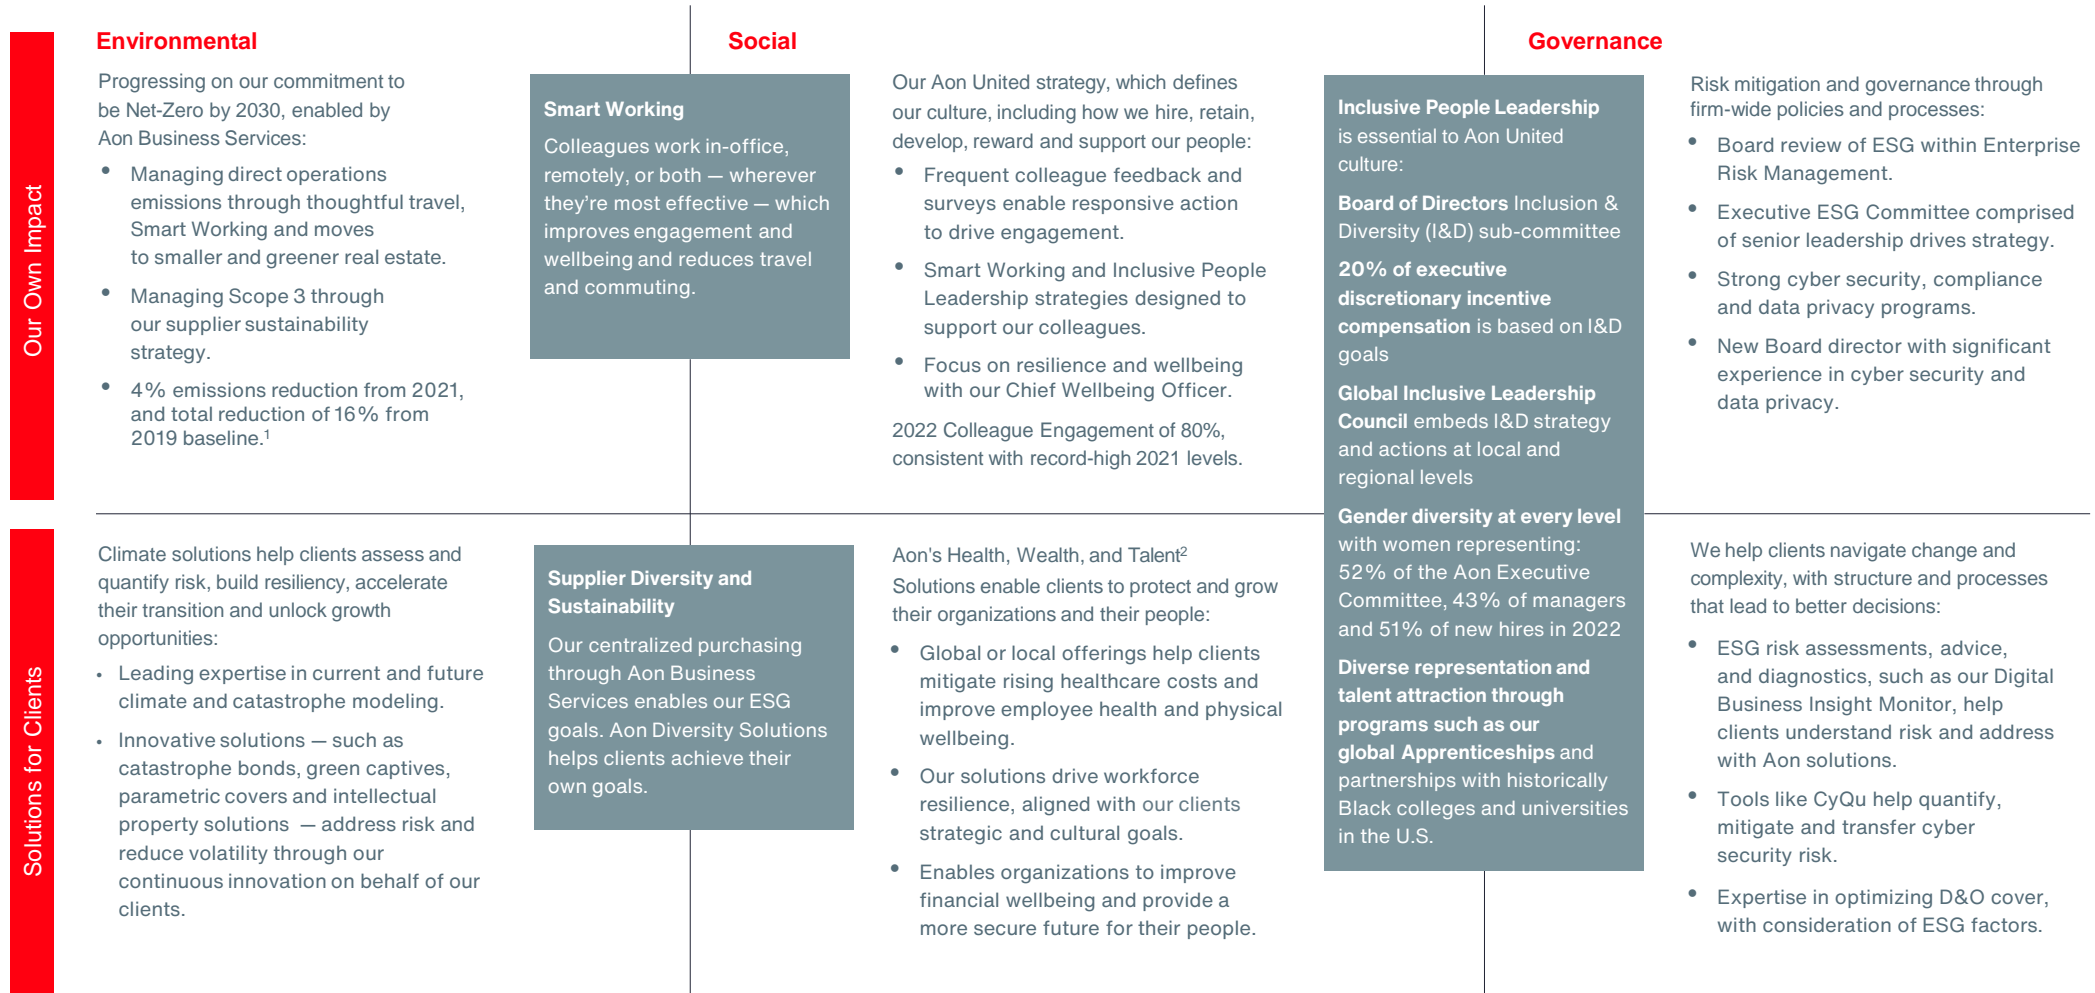

CapEx in line with current guidance
(No incremental capex)

1. Charges of \$6m were incurred in Q3 2023. Do not expect material program savings in 2023.

Aon United - Driving Top and Bottom-Line Results^{1,2}

Committed to Mid-Single-Digit or Greater Organic Revenue Growth Over the Long-Term

- Track record of +4% average annual organic revenue growth from 2010-2022, with +6% organic revenue growth in 2022
- Driven by three areas: Delivering client value with continued improvement in core businesses, portfolio mix-shift towards areas of faster growing client demand and data-driven solutions, and net new opportunities that increase our total addressable market

Sustainable Operating Margin Expansion Net of Investment in Long-Term Growth

- From 2010-2022, increased adjusted operating margins by +1,120 bps or over +90 bps per year
- Driven by three areas: Top-line growth, portfolio mix-shift to higher contribution margin businesses, and increased operating leverage from ongoing productivity improvements from our Aon Business Services platform

Expected Free Cash Flow Growth Over the Long-Term

- Expect to deliver high-single-digit free cash flow growth in 2023. While free cash flow will be reduced in the near term by the restructuring program, we expect to return to our trajectory of double-digit free cash flow growth over the long term, driven by growth in operating income and ~\$500 million long-term improvement opportunity in working capital

Disciplined Portfolio Management and Capital Allocation based on Return on Invested Capital (ROIC)

- Strong history of M&A and portfolio management, including completion of 164 acquisitions for ~\$5.8 billion and 141 divestitures for ~\$5.8 billion from 2010-2022³
- All capital allocation decisions based on ROIC. Share repurchase continues to be our highest return opportunity, based on our strong free cash flow generation outlook, noting history of \$22.5 billion in share buyback from 2010-2022, or a net share reduction of approximately 38%⁴, and \$4.1 billion remaining repurchase authorization as of the end of Q3 2023
- Significant financial flexibility to deploy capital driven by strong free cash flow generation and opportunity for increased debt

Translating into a Significant Shareholder Value Creation Opportunity

- Going forward, we expect to build on our demonstrated track record of free cash flow growth combined with an expected reduction in total shares outstanding, representing a significant long-term shareholder value creation opportunity

Return on Invested Capital (ROIC) is a non-GAAP measure calculated as adjusted net operating profit after tax (NOPAT) divided by average invested capital (short-term debt, + long-term debt + total equity) and represents how well we are allocating our capital to generate returns. The metric for the historical periods shown below was calculated using financial results for total consolidated Aon, and therefore includes discontinued operations in connection with the sale of the outsourcing business completed on May 1, 2017, which will not be included on a going forward basis.
