This communication contains certain statements related to future results, or states Aon's intentions, beliefs and expectations or predictions for the future, all of which are forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from either historical or anticipated results depending on a variety of factors. These forward-looking statements include information about possible or assumed future results of Aon's operations. All statements, other than statements of historical facts, that address activities, events or developments that Aon expects or anticipates may occur in the future, including such things as its outlook, future capital expenditures, growth in commissions and fees, changes to the composition or level of its revenues, cash flow and liquidity, expected tax rates, expected foreign currency translation impacts, business strategies, competitive strengths, goals, the benefits of new initiatives, growth of its business and operations, plans, and references to future successes, are forward-looking statements. Also, when Aon uses words such as "anticipate", "believe", "continue", "could", "estimate", "expect", "forecast", "intend", "looking forward", "may", "might", "plan", "potential" "probably", "project", "should", "will", "would" or similar expressions, it is making forward-looking statements.

The following factors, among others, could cause actual results to differ from those set forth in or anticipated by the forward looking statements: changes in the competitive environment, due to macroeconomic conditions (including impacts from instability in the banking or commercial real estate sectors) or otherwise, or damage to Aon's reputation; fluctuations in currency exchange, interest, or inflation rates that could impact our financial condition or results; changes in global equity and fixed income markets that could affect the return on invested assets; changes in the funded status of Aon's various defined benefit pension plans and the impact of any increased pension funding resulting from those changes; the level of Aon's debt and the terms thereof reducing Aon's flexibility or increasing borrowing costs; rating agency actions that could limit Aon's access to capital and our competitive position; volatility in Aon's global tax rate due to being subject to a variety of different factors, including the adoption and implementation of OECD tax proposals; changes in Aon's accounting estimates or assumptions on Aon's financial statements; limits on Aon's subsidiaries' ability to pay dividends or otherwise make payments to Aon; the impact of legal proceedings and other contingencies, including those arising from acquisition or disposition transactions, errors and omissions and other claims against Aon; the impact of, and potential challenges in complying with, laws and regulations in the jurisdictions in which Aon operates, particularly given the global nature of Aon's operations and the possibility of differing or conflicting laws and regulations, or the application or interpretation thereof, across jurisdictions in which Aon does business; the impact of any regulatory investigations brought in Ireland, the U.S., and other countries; failure to protect intellectual property rights or allegations that Aon infringes on the intellectual property rights of others; general economic and political conditions in different countries in which Aon does business around the world; the failure to retain, attract and develop experienced and qualified personnel; international risks associated with Aon's global operations, including impacts from military conflicts or political instability, such as the ongoing Russian war in Ukraine; the effects of natural or man-made disasters, including the effects of the COVID-19 and other health pandemics and the impacts of climate change; any system or network disruption or breach resulting in operational interruption or improper disclosure of confidential, personal, or proprietary data, and resulting liabilities or damage to our reputation; Aon's ability to develop, implement, update and enhance new systems; the actions taken by third parties that perform aspects of Aon's business operations and client services; the extent to which Aon is exposed to certain risks, including lawsuits, related to actions Aon may take in being responsible for making decisions on behalf of clients in Aon's investment businesses or in other advisory services that Aon currently provides, or may provide in the future; Aon's ability to continue, and the costs and risks associated with, growing, developing and integrating acquired business, and entering into new lines of business or products; Aon's ability to secure regulatory approval and complete transactions, and the costs and risks associated with the failure to consummate proposed transactions; changes in commercial property and casualty markets, commercial premium rates or methods of compensation; Aon's ability to develop and implement innovative growth strategies and initiatives intended to yield cost savings, and the ability to achieve such growth or cost savings; the effects of Irish law on Aon's operating flexibility and the enforcement of judgments against Aon; and adverse effects on the market price of Aon's securities and/or operating results.

Any or all of Aon's forward-looking statements may turn out to be inaccurate, and there are no guarantees about Aon's performance. The factors identified above are not exhaustive. Aon and its subsidiaries operate in a dynamic business environment in which new risks may emerge frequently. Accordingly, you should not place undue reliance on forward-looking statements, which speak only as of the dates on which they are made. In addition, results for prior periods are not necessarily indicative of results that may be expected for any future period. Further information concerning Aon and its businesses, including factors that potentially could materially affect Aon's financial results, is contained in Aon's filings with the SEC. See Aon's Annual Report on Form 10-K for the year ended December 31, 2022 for a further discussion of these and other risks and uncertainties applicable to Aon and its businesses. These factors may be revised or supplemented in subsequent reports filed with the SEC. Aon is not under, and expressly disclaims, any obligation to update or alter any forward-looking statement that it may make from time to time, whether as a result of new information, future events or otherwise.

### **Explanation of Non-GAAP Measures**

This communication includes supplemental information not calculated in accordance with generally accepted accounting principles in the United States ("U.S. GAAP"), including organic revenue growth, free cash flow, free cash flow margin, return on invested capital, adjusted operating income, adjusted operating margin, adjusted earnings per share, adjusted net income attributable to Aon shareholders, adjusted net income per share, and adjusted effective tax rate that exclude the effects of intangible asset amortization and impairment, pension settlements, capital expenditures, and certain other noteworthy items that affected results for the comparable periods. Organic revenue growth includes the impact of intercompany activity and excludes foreign exchange rate changes, acquisitions, divestitures, transfers between revenue lines, fiduciary investment income, and gains or losses on derivatives accounted for as hedges. Currency impact represents the effect on prior year period results if they were translated at current period foreign exchange rates. Reconciliations to the closest U.S. GAAP measure for each non-GAAP measure presented in this communication are provided in the attached appendices. Supplemental organic revenue growth information and additional measures that exclude the effects of certain items noted above do not affect net income or any other U.S. GAAP reported amounts. Free cash flow is cash flow and impairment, and certain other noteworthy items. Management believes that these measures are important to make meaningful period-to-period comparisons and that this supplemental information is helpful to investors. Management also uses these measures to assess operating performance and performance for compensation. Non-GAAP measures should be viewed in addition to, not in lieu of, Aon's Consolidated Financial Statements. Industry peers provide similar supplemental information regarding their performance, although they may not make identical adjustments.

# Appendix C: Adjusted Operating Income and Margin and Reconciliation of Return on Invested Capital (ROIC)

Return on Invested Capital (ROIC) is a non-GAAP measure calculated as adjusted net operating profit after tax (NOPAT) divided by average invested capital (short-term debt, + long-term debt + total equity) and represents how well we are allocating our capital to generate returns. The metric for the historical periods shown below was calculated using financial results for total consolidated Aon, and therefore includes discontinued operations in connection with the sale of the outsourcing business completed on May 1, 2017, which will not be included on a going forward basis.

# Appendix D: Other Income (Expense) Under Pension Accounting Standard Effective 1/1/2018 (ASU No. 2017-07)

With the exception of service cost, all financial components of net periodic pension cost and net periodic postretirement benefit cost shifted from above the line in compensation and benefits expense to below the line in other income / expense.

Based on current assumptions, our best estimate is approximately \$66 million of non-cash pension expense in 2023 spread evenly throughout each quarter as part of other income / expense, excluding all other items we do not forecast that could be favorable or unfavorable in any given period.

# **Appendix E: Reconciliation of Free Cash Flow & Free Cash Flow Margin**

Free Cash Flow Margin is a non-GAAP measure calculated as Free Cash Flow (defined as Cash Flows from Operations less Capital Expenditures) / Total Revenue and represents our conversion rate of revenue into cash. The metric for the historical periods shown below was calculated using financial results for total consolidated Aon, and therefore includes discontinued operations in connection with the sale of the outsourcing business completed on May 1, 2017, which will not be included on a going forward basis.

This resulted in reclassifying \$94M and \$115M for the FY'11 and FY'12, respectively, from "Accounts payable and accrued liabilities" and "Other assets and liabilities" within Cash Flows From Operating Activities, to "Issuance of shares for employee benefit plans" within Cash Flows From Financing Activities.
